Meet our ISA (International Society of Arborists) Certified Arborists:

Bryan Smith
Zanesville, Certified Arborist

Jim Murphy
Certified Arborist

Randy Ruggles
Newark, Certified Arborist

Rich Germann
Columbus General Manager

ARBORISTS SPECIALIZE IN THE CARE OF INDIVIDUAL TREES.

Arborists are knowledgeable about the needs of trees and are trained and equipped to provide proper care. Hiring an arborist is a decision that should not be taken lightly. Proper tree care is an investment that can lead to substantial returns. Well cared-for trees are attractive and can add considerable value to your property. Poorly maintained trees can be a significant liability. Pruning or removing trees, especially large trees, can be dangerous work. Tree work should be done only by those trained and equipped to work safely in trees.

Justin Farris
Snow and Ice Manager, Certified Arborist

LET'S BE SOCIAL!    

- Very little of a tree's volume is actually "living" tissue. Just 1% of a tree is actually alive and composed of living cells.
- Worldwide, the number of tree species may exceed 50,000.
- 11% of people are left handed.

Shakin' the Family Tree

In 2016, we had some changes in staff with a team member moving into a management position and others taking on more responsibility...all this took place smoothly! Transitions come with every company and at McCullough's Tree Service, we make sure our team members are properly trained and cross trained so when changes come, we don't miss a beat and our customers always receive the best of care. Families come in all forms, our team members are our extended family and we want to see them exceed and excel!

At McCullough's Tree Service, we're proud to say we offer jobs in Muskingum, Licking and Franklin counties!

What a few of our customers have to say:

"I was absolutely amazed how fast the crew cut down my old tree, stump grind and planted a new tree, very professional".
- Michael R.

"Arrived on time and did a great job".
- Chance B.

"Professional and courteous, exceeded my expectations".
- Jackie H.

"Contacted McCullough's through their website, work was flawless".
- Ruth M.

"Very neat and careful, I recommend McCullough's Tree Service".
- Kate C.

"Great to work with on all my projects."
- Jim B.

"Did everything asked of them, I couldn't be more pleased".
- Ryan F.

Tree Replacement

The loss of a large tree can leave a significant and unsightly gap in an otherwise beautiful landscape. McCullough's will help you fill this void with just the right tree suited to the setting and your preferences.

McCullough's arborists are experts at selecting and planting large trees. You don't have to wait for 10 or more years for a tree to reach optimal size. McCullough's arborists will locate a tree proportionate to your landscape's needs, plant it properly and guarantee its health. With McCullough's staff of knowledgeable experts, you can be sure the job is done right!

National Arbor Day, celebrated this year on April 28th, reminds us of the importance of trees in our environment and encourages tree planting. The planting of a tree can also be used as a wonderful way to commemorate a particular event such as the birth of a child, an anniversary or to honor the passing of a close friend or relative. McCullough's arborists welcome the opportunity to assist you with the selection and planting of a living "memorial" or "in honor" tree.

**Call McCullough's today for a no obligation site assessment and quote.
We will find and plant the right tree for you!**

Leaf've it to a LEAF to be so IMPORTANT!

Leaves are food factories for the tree. Powered by sunlight, the green substance in leaves called chlorophyll, use carbon dioxide and water to produce life-sustaining carbohydrates (sugars). The entire process is called photosynthesis.

A tree's leaves are also responsible for the twin functions of respiration and transpiration. Both of these processes support evapotranspiration which allows the tree to move water and nutrients up from the roots.

Through small openings on the leaf, called stomata, a tree can regulate moisture and gases. With the exchange of water and the absorption of carbon dioxide during the process of photosynthesis, the release of life-sustaining oxygen occurs as a by-product.

Visit a beautiful place this Spring and Summer season, Mission Oaks Garden in Zanesville, Ohio. Mission Oak Gardens is a beautiful urban garden with over 7 acres of trees, flowers, waterfalls, walking paths and more! <http://www.missionoaksgardens.org>

In the middle of busy, there's always time for family!

Thoughts from the Tree House

Warmer weather, peepers singing in the early dusk, flowers popping up through the dirt and the smell of spring in the air...seems like we have been waiting forever. It's another opportunity for new beginnings in our lives, but also time for new ideas and changes to our landscaping. Perhaps a new tree here or there, shaping up the existing trees and shrubs and planting some new perennials or annuals to welcome the warmer weather and add a certain pizzazz to your home! As always, you know McCullough's Tree Service is here for you. Make sure you are making spring changes to "you" too! A new season, a new beginning, a new landscaping look and a new you!

Take the time to ask yourself what makes you happy. When you discover what that is...do it. Life is short, we only get one walk through this life, make it a beautiful journey.
